

## **R 20-06 Motion by Petition for the Student Association to endorse the Kenly Wind Farm**

**Proposer: Adam Polánek (170019080)**

**In effect: Immediately**

The Kenly Wind Farm is a university-led project that aims to build six wind turbines on a site located a few miles southeast of St Andrews.

### **Notes:**

- 1) In 2013, the University of St Andrews gained planning permission to build a wind farm at Kenly.
- 2) This would produce enough energy to save more than 19,000 tonnes of carbon per year, making the university carbon-neutral and energetically self-sufficient, and virtually the most sustainable institution in the UK, if not Europe.
- 3) An online petition in support of the project now has some 1,100 signatories including students, lecturers, locals, and people from Aberdeen and Edinburgh. Furthermore, the Kenly Wind Farm was endorsed by tens of local student societies, thirty of which are listed on a separate page attached to this petition. Other supporters include the former MP Stephen Gethins and the current MP Wendy Chamberlain.

### **Believes:**

- 1) Building the wind farm would set a precedent other institutions could follow.
- 2) In times of a global climate emergency all institutions, including those of higher education, need to adopt necessary measures to avert environmental collapse.
- 3) Endorsing the wind farm is not only an ethical imperative, but something the people who live in St Andrews call for.

### **Resolves:**

- 1) To endorse the campaign for a wind farm at Kenly.
- 2) To help coordinate student, local and University efforts to receive a planning permission from the Ministry of Defence.
